## USEFUL HORTICULTURAL BOOKS FOR CHRISTMAS PRESENTS

THE NURSERY MANUAL: By Prof. L. H. Bailey. Mr. Bailey's Nursery Book was first published in 1891. For about thirty years it has been a standard work on the propagation of plants by means of seeds, layers, cuttings, buds, grafts and otherwise. The present work is the twenty-second edition of it, rewritten and all made new. It contains an extended alphabetic list of plants with full indications under each one for propagation. It also includes an illustrated account of the main diseases and insects of nursery stock, invaluable to the commercial grower.....Price, Postpaid \$2.50.

SEEDING AND PLANTING: By Prof. James W. Toumey, Yale University. A manual for the guidance of Forestry students, Forester, Nurserymen, Forest owners and Farmers. The Nurseryman and Forester will find this book of great value to him in growing trees from seed. It contains real information and covers the entire subject from the collection of the seed, how they are gathered, treated and extracted to the testing, the storage, the best soil, planting and transplanting, preparing seed beds and protection against birds, etc. Every subject is treated in the greatest detail and is a book you will refer to most every day.....Price, Postpaid \$4.25.

PLANT PROPAGATION, GREENHOUSE AND NURSERY PRACTICE: By M. G. Kains. This is a practical book on the propagation of plants. It is illustrated by numerous drawings and photos taken in nurseries, greenhouses and other establishments in widely separated parts of the United States and abroad. It devotes many pages to special plant lists and condensed directions for propagation of vegetables, fruits, annual and perennial flowers, bulbs, ferns, orchids, evergreens, deciduous trees and shrubs, vines, house and greenhouse plants. Then follow chapters on germination, seed testing, potting, layerage, bottom heat, cuttage, classes of cuttings and graftage. Illustrated, 5 1/2 x 7 1/2 inches, 342 pages.....Price, Postpaid \$2.50.

THE CULTIVATED EVERGREENS: By Prof. L. H. Bailey. This book should be in every Nurseryman's, Landscape Gardener's and Architect's office. It supplies authoritative information on the use of evergreens in the planted landscape, on soils and locations, planting and pruning, cultivation, identification, and treatment of the leading insects and diseases. The species and horticultural varieties in the United States and Canada are described for the purpose of identifications, as are also the most important kinds of broad-leaved evergreens, such as rhododendrons, laurels and hollies. It is beautifully illustrated with photographs and line drawings.....Price, Postpaid \$5.25.

THE MANUAL OF TREE AND SHRUB INSECTS: By Ephraim Porter Felt, State Entomologist of New York. The one book indispensable for every Nurseryman to make it possible to combat the ever-increasing tree and shrub insects that attack shade and forest trees and shrubs. The author gives a general account in part one of the book of the nature and transformation of the insects, their place and balance in the world of living things, the checks that have arisen in the course of time, and the means by which man has learned to control them. In part two he is concerned with insects attacking shade trees and ornamentals, and it includes full descriptions of these insects, the injuries they cause, and the means of checking or repairing the damage. Part three deals in a similar way with forest insects, while part four gives a systematic account of the characteristics and habits of the more important groups of insects affecting trees and shrubs.

Price, Postpaid \$3.75.

NEW EDITION OF BAILEY'S CYCLOPEDIA OF HORTICULTURE: By Prof. L. H. Bailey. This cyclopedia meets every need of the commercial and professional horticulturist, and in the desire to bring this famous work within the means of all lovers of horticulture, the publishers have brought out this three-volume edition at half the price of the former set. This three-volume set contains all the information for which the former six-volume set was so justly famous, being printed from the same plates on special paper which though not bulky is remarkably tough and durable. It makes a compact yet thorough presentation of the kinds, characteristics and methods of cultivation of the species of plants grown in the regions of the United States and Canada for ornament, for fancy, for fruits and for vegetables. Formerly in six volumes at \$40.00, now in three at (E.O.R. GERMANTOWN).....\$20.00.  
ORDER NOW AS THE PRICE ADVANCES AFTER JANUARY 1st, 1927 (E.O.R. GERMANTOWN) TO...\$25.00.
